

FIG. 1 is a cross-sectional view of a device in accordance with the present invention, showing a housing 1, a central shaft 2, and a plurality of blades 3. The blades 3 are arranged in a circular pattern around the shaft 2. The housing 1 is shown in cross-section, revealing internal components such as a bearing 4, a seal 5, and a gasket 6. The blades 3 are shown in cross-section, revealing a curved shape and a central hub 7. The blades 3 are connected to the shaft 2 by a series of pins 8. The blades 3 are shown in a retracted position, with the central hub 7 visible. The housing 1 is shown in a cross-sectional view, revealing internal components such as a bearing 4, a seal 5, and a gasket 6. The blades 3 are shown in cross-section, revealing a curved shape and a central hub 7. The blades 3 are connected to the shaft 2 by a series of pins 8. The blades 3 are shown in a retracted position, with the central hub 7 visible.
